

January 15, 2007

Dear Felix Customer,

Accelrys is pleased to announce the transfer of our Felix line of software products to Felix NMR, Inc., effective January 15th, 2007. Steve Unger, Ph.D., president of Felix NMR, Inc., brings with him about 20 years of history and expertise with the Felix software. Felix NMR, Inc. specializes in NMR processing and analysis software and is committed to the continued development of Felix. It is our belief that this transition will benefit our Felix customers by offering expert, personalized Felix support and software development.

We have been working closely with Felix NMR, Inc. to make this transition as seamless as possible for our customers. As of January 15th, 2007, Felix NMR, Inc. will be fulfilling all existing Accelrys contractual obligations on Accelrys' behalf including new software releases of Felix. Accelrys contract support for Felix software products will terminate upon your next maintenance contract renewal date. At that time, we hope you will renew your maintenance or purchase new software from Felix NMR, Inc.

There is no action necessary on your part during this transition. Please note the new contact numbers and e-mail addresses for Felix shown below will be effective January 15th, 2007. Any sales or support requests that come to Accelrys will be forwarded to Felix NMR, Inc.

If you have any additional questions, please call our support line and we will be happy to answer them. You should receive additional announcements and information on the upcoming release of Felix release through Felix NMR, Inc.

Please feel free to contact Accelrys or Felix NMR, Inc. if you have any questions regarding the Felix software or continued support for Felix.
